

SAFER Driver's Challenge: Air Brake Refresher Module

Empowering Drivers for Enhanced Road Safety

Understanding air brakes is crucial for drivers handling heavy vehicles. The SAFER Driver's Challenge: Air Brake Refresher Module is meticulously crafted to refresh drivers knowledge on the mechanics of air brakes, ensuring safer driving experiences.

What Is It?

- » **Comprehensive Learning:** Reviews the fundamentals of air brakes, focusing on their operational principles and safety relevance.
- » **Practical Skills:** Gives a refresher on critical tests such as Low Air Warning, Air Pressure Build-up, Governor Cut-out and Cut-in, Air Loss Rate, Service Brake, and Spring Brake Tests.
- » **Enhanced Safety:** Highlights the importance of correct air brake usage to prevent accidents and ensure vehicle longevity.
- » **Interactive Training:** Engages drivers with practical scenarios and interactive learning techniques.
- » **Certification:** Upon completion, participants receive a certificate noting they received NTSI Air Brake Refresher training.

Who Should Enroll?

Ideal for experienced drivers of heavy-duty vehicles, that are already familiarized with air brakes and may be needing a refresher to ensure they are equipped with the knowledge and skills for safe and efficient driving.
